Contemporary Internal Doors	29	
Traditional Internal Doors	41	
Specialty Doors	51	

Corinthian offers the largest range of doors and door systems designed, manufactured and tested to meet the regulatory requirements of building in a designated bushfire zone. Throughout this brochure look for the flame symbols that indicate the door design can be constructed to comply with BAL12.5 or BAL40 criteria as specified in AS3959. All BAL40 doors can be used in any bushfire attack zone up to and including BAL40.

Traditional Entry Doors

Style, grace and grandeur are words that are often used to describe homes with a traditional style of architecture and appearance. The Corinthian range of traditional entry doors are in true keeping with this style of home and exude the timeless appeal of days gone by.

Windsor

Boasting the quality and charm of authentic joinery products, Windsor is the ideal complement to traditional architecture. It features select grade veneer finish and solid construction utilising traditional joinery stile and rail construction, solid timber panels and precision flush joints. The Windsor range of doors is suitable for staining or painting.

Bushfire Doors

Corinthian offers the largest range of doors designed and manufactured to meet the regulatory requirements of building in a designated bushfire zone. As well as the BAL40 range, we have a comprehensive range of doors that meet BAL12.5 criteria as specified in AS3959.

Select from either primed or veneer finished routed doors and sidelites, both with and without glazed openings. Or for a truly crafted door, we have a wide range of joinery doors and sidelites available in Merbau or Meranti, with or without glazed openings.

Look for the following symbols throughout the brochure to assist with your choice in bushfire doors.

BAL40

BAL12.5

Cavity Slider Solutions

Corinthian's Slimline range is the ultimate space saver allowing you to utilise the floor and wall area that traditional doors cover. Incorporating leading edge technology in the track and roller system, now you don't have to compromise design aesthetics. Corinthian offers a range of cavity door solutions for standard sized doors (Slimline 3000), floor to ceiling height doors (Slimline 9000), heavy timber and custom doors (Slimline 6000).

Features

- Can accommodate doors up to 125kg in weight.
- Can accommodate doors in standard heights of 2040mm and 2340mm as well as custom door heights and a wide range of widths.
- Easy removal of doors for painting or staining.
- Available in single or double openings.
- The roller mechanism is smooth and rattle free when in use and operates on a jump-proof twin roller track.

Note: Slimline 3000 maximum door weight 65kg, standard door heights 2040mm and 2340mm only.

Interblind

It's never been easier to control the light, the look and privacy of a room. Corinthian's fully functional internal blind system lets you make the choice without any of the cleaning and maintenance hassles of conventional blinds. Magnetically driven, these fully functional blinds tilt a full 180° and raise and lower for complete visibility. The micro venetians are encased between two sheets of safety glass removing the need for cleaning or maintenance and are backed by a 20 year guarantee.

General Information

- Corinthian door care and finishing information, installation instructions, trimming allowances and construction details can be found at corinthian.com.au or contact your local Corinthian office for further information.
- This brochure features an extensive range of Corinthian products that are generally available at the time of printing. However in the interest of quality and performance, availability of doors and designs may vary.
- Photographs or illustrations may not exactly depict the design, colour or specification accurately and Corinthian recommends visiting a showroom.
- Door designs and their availability, glass options and other door hardware may vary from state to state. Contact your local Corinthian office for further information.
- Due to the manufacturing process Corinthian cannot guarantee that horizontal rout lines will align on sets of double doors that have this feature.
