

# enviroseal door entry system

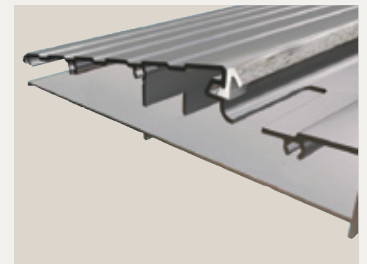

Door entry systems with Enviro-seal™ will help homes achieve valuable energy savings.

Gaps around doors and windows in the average home can result in a serious loss of winter warmth or summer's air-conditioned cool.

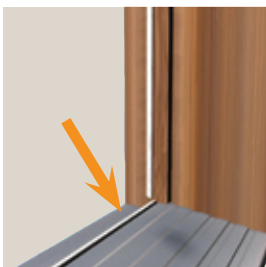

## KEY FEATURES:

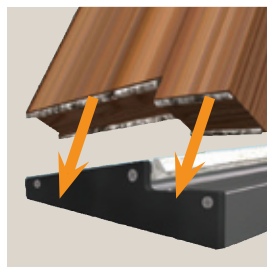

- Energy savings for the home.
- Provides wind and noise insulation.
- Reduction of dirt penetration into the home.
- Self draining sill conducts rain away from the door.
- Backed by Corinthian's 5 year guarantee.

Aluminium, self-draining sill protects your door from rain and reduces dirt penetration.

Enviro-seal assists in energy saving for the home whilst providing wind and noise insulation and preventing water penetration and air leaks.

Enviro-seal beneficially seals your entrance door around factory-fitted jambs and across a self-draining sill.

The Enviro-seal sill is available in a natural anodised finish for durability and a smart, modern look.
