THE BIG RIVER FORMWORK RANGE

Big River both manufactures their own high quality formwork products and supplies the leading industry brands. Discover the benefits of both and find the right one for your project.

BIG RIVER AMOURDECK

Manufactured by Big River Group, the formwork specialists, Armourdeck™ steel formwork caters for industry requirements of fast, efficient suspended concrete slabs creation.

Available in two widths, 300 and 600mm, and with a composite action you can expect increased efficiency when forming a high performance composite slab.

BIG RIVER ARMOURFORM

Big River Group manufactures a wide range of plywood formwork products. We supply the broadest range of any supplier including F27, F22, F17, F14. All Big River Armourform formply is EWPA approved and JAS-ANZ accredited.

Big River stocks a full range of formwork, LVL and edgeboards.

BIG RIVER PERMAFORM

Permaform is an extruded Polyvinyl Chloride (PVC) permanent wall formwork system. It consists of a number of outer edges that interlock via central link panels; these join the sides prior to the concrete core filling. Permaform is compliant with AS3600 & AS3610 and satisfies all relevant aspects of the BCA and AS/NZS 3837:1998 fire provisions, acoustic, WH&S and structural integrity.

Once filled it serves as a structural element allowing the builder to reduce the overall construction time and cost of the project.
