ENTER WITH STYLE™

# The evolution of Trilock®

Gainsborough's Trilock® is a leading brand that has influenced the market for over 20 years, evolving to complement emerging market trends.

## How Trilock® works.

## Trilock® 3-in-1 technology.

### Passage set convenience

When Trilock® is unlocked and the button has not been pressed, it operates as a standard passage set, allowing free access in or out of the home.

### Lockset with safety

Pressing the button on the inside of the door engages the Trilock® lockset mode. This locks the door from the outside, however it is safe to exit without a key in an emergency by simply turning the inside knob or lever.

### Deadbolt security

Trilock® houses a key-operated double cylinder deadbolt, with a sturdy 20mm throw, to keep possessions and valuables safe whilst the home is unoccupied (single cylinder version features inside turn-button).

**GAINSBOROUGH TRILOCK**
