Structural Particleboard Flooring

EnduraFloor by Laminex Particleboard Flooring is made from a moisture resistant particleboard and features an easy to use tongue and groove system that gives the flooring remarkable strength in between joists. EnduraFloor by Laminex Particleboard Flooring can be used on timber, laminated timber and steel framed building constructions including fitted floor, upper storey and platform construction.

Product Range

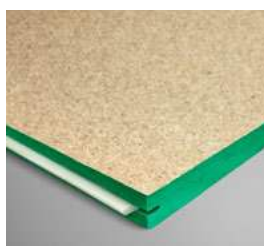

EnduraFloor by Laminex Particleboard Flooring has a plain, raw core colour with a green wax edge seal to all edges. There are three product thicknesses each identified by the colour of their PVC tongue:

- Green tongue (19mm) – For use with floor joists spaced at 450mm
- Beige tongue (22mm) – For use with floor joists spaced at 600mm
- Brown tongue (25mm) – For commercial applications

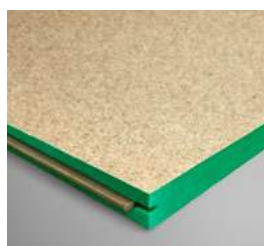

EnduraFloor by Laminex Particleboard Flooring is also available in a Termite Treated option (identified with red wax sealed edges).

General Purpose
Green Tongue - 19mm

General Purpose
Beige Tongue - 22mm

Brown Tongue - 25mm

Termite Treated
Green Tongue - 19mm

Termite Treated
Beige Tongue - 22mm

Superior moisture resistance

Unlike many particleboards, EnduraFloor by Laminex Particleboard Flooring is manufactured using wood particles which are encapsulated in resins ensuring the moisture resistance is distributed throughout the floor panel. Even when left exposed to the elements for up to five months (applies only to 900mm wide panels) EnduraFloor by Laminex Particleboard Flooring is guaranteed to meet the required standards (if guidelines are followed).
