

PARTICLEBOARD FLOORING

EnduraFloor™ by Laminex

Laminex®

Experience the convenience of having everything delivered together!

Explore our **EnduraFloor™** and **Secura™** Flooring options. We'll help you find the right solution to streamline your build.

EnduraFloor™ by **Laminex** features a raw core with a green wax edge seal and a user-friendly tongue-and-groove system that ensures strength and stability, even at unsupported joints. It provides a solid foundation for framing or flooring.

Available in thicknesses:

Green tongue (19mm) – For floor joists spaced at 450mm.

Beige tongue (22mm) – For floor joists spaced at 600mm.

Brown tongue (25mm) – For commercial use.

A Termite Treated option is also available with red wax-sealed edges.

STRUCTURAL FLOORING

James Hardie Secura™

Secura™ Flooring is a high-performance, moisture-resistant solution for both interior and exterior use. Being 24% lighter than compressed fibre cement, **Secura™ Flooring** allows for faster and easier installation.

For interiors, it eliminates the need for underlay and structural modifications, helping achieve a 7-star rating.

For exteriors, it provides enhanced moisture protection and strength for tile finishes on timber or steel joists.

It's easy to handle and available in 2 sizes:
2700×600×19mm & 2400×600×22mm.

Key Features:

- Can be gun nailed
- Resistant to rot, and damage from termites and moisture
- It can be exposed to the elements for up to 3 months without warping or twisting
- 25-year product warranty
- Australian Made
