

PROPS RANGE

WHEN SUPPORTING YOUR STRUCTURE CHOOSE BIG RIVER PROPS

Big River Props are designed and manufactured to be functional and used by everyone from the home handyman to the qualified tradesman.

Used as temporary support during building work and able to be freely adjusted within a range of heights Big River's Prop is a versatile piece of construction equipment that should be part of every tradesman's kit.

FULLY GALVANISED Big River Group's props are fully hot-dipped galvanised which includes the inner & outer tube, base & head plate and the threads. Our special technique involves the galvanising to take place only after the welding and threading process has been completed.

Inner tube: 48.3mm x 4mm

Outer tube: 60.3mm x 3.6mm

Head / Base Plate: 150mm x 150mm x 8mm thick

Size	Closed (H)	Extended (H)	Load at Closed	Load at Extended
00	0.60	1.05	-	-
0	1.09	1.96	5080 kg	5080 kg
1	1.63	2.72	5080 kg	2540 kg
2	1.98	3.35	3000 kg	1900 kg
3	2.59	3.96	3630 kg	1670 kg
4	3.28	5.13	3770 kg	1300 kg
