BIG RIVER

PRE-FABRICATED WALL FRAMES

Enable a fast, effective building method that can provide significant labour, cost and time savings, while minimizing waste.

Pre-fabricated wall frames are manufactured in a controlled, indoor environment where we design, measure, cut and assemble each piece to expertly fit its desired end-use. It is a cost-effective method that allows the project to stick to tight budgets and strict timelines.

FEATURES

- Fast, easy installation
- Flexible designs
- Precision engineered for purpose
- In-house design
- Built in controlled, indoor environment

BENEFITS

- Minimises waste to reduce costs
- Less cutting for trades
- No bending over producing wallframes on the ground
- Quicker installation, less time on site
- Design team available for your convenience
- Designed fit for purpose for individual project
- Minimal site theft
