Re: Big River Plywood Warranty

Big River Formply is warranted to meet Australian Standard AS/NZS 6669:2007

Big River Structural Plywood is warranted to meet Australian Standard AS/NZS 2269:2012

Big River Exterior Plywood is warranted to meet Australian Standard AS/NZS 2271:2004

The Big River Group places an emphasis on verifying the quality of our plywood products through continuous monitoring; including the requirements set out in AS/NZS 6669, AS/NZS 2269, and AS/NZS 2271, as well as testing in accordance with AS/NZS 2098 including compliance for moisture content, bond quality, and dimensional stability.

Furthermore, the products are certified by either the Engineered Wood Products Association of Australasia (EWPAA), The British Standards Institution (BSI), or SAI Global, via regular audits of our supplier mills manufacturing processes and control systems.

The Big River Group also voluntarily engages the Timber Testing Centre for additional third-party testing of strength, thickens control and bond quality.

The Big River Group does not provide a contractual warranty against defects in relation to the products. However, where the products are supplied in trade or commerce to a consumer, they will come with consumer guarantees that cannot be excluded under the Australian Consumer Law.

Regards,

Craig Dorward
